Upland on Foothill Boulevard, U. S. No. 66

Ontario, California

Terms of Sale

ACCEPTANCE OF ORDERS—We accept all orders on condition that same shall be void should any injury befall our stock from fire, frost, floods, drouth, or any other cause which could not be prevented and over which we have no control.

GUARANTEE—We exercise great care to have our nursery stock true to name; nevertheless it is understood that should any stock prove otherwise, we shall not be liable for any sum greater than that paid us for only such stock as shall prove untrue.

TERMS CASH—All prices payable F. O. B. Ontario, unless otherwise designated.

Description of Nursery and Growing Conditions

One of our nurseries is located in the Foothill Section known as the Orange Belt of Southern California. It is situated on the U. S. Highway No. 66, the main road leading to the East.

At this plant we produce our Iris, Heather, Chrysanthemums, Camellias, Cocos Plumosa Palms, Roses, and such stock as requires a frost-free locality. We have seventy acres devoted to this class of plants.

Our Freesias, Ranunculus and Anemones are grown at our Oceanside Grounds at Oceanside, California.

Visitors are always welcome.

KRAMER BROS. NURSERIES

P. O. BOX 2, ONTARIO, CALIFORNIA

Nurseries located one and one-half miles east of Upland on
Foothill Boulevard, U. S. No. 66.

OCHROLEUCA IRIS

The finest of all Irises for early summer cut flowers. They last a long time with several blossoms 6 inches across coming out in succession. Plants grow from rhizomes out of doors and become more prolific each year without transplanting. Hardy anywhere in the United States.

We have sold as many as fifty thousands rhizomes to single customers, and hundreds are increasing their profits with this item. It has been proved profitable from Seattle to New York, and in the south; a consistent item on the cut flower markets.

Five-inch pot size and larger are well budded in season.

KRAMER BROS. NURSERIES, ONTARIO, CALIFORNIA

CALIFORNIA is noted for its outstanding flower production and especially so when it comes to Chrysanthemums. Because they do so well here and are produced in such abundance, California has been in the forefront in producing successful market varieties as well as many new interesting forms. We are pleased to again offer a set of new Chrysanthemums that will be interesting and profitable wherever grown.

Outdoor grown stock has been proved to be vigorous and full of stamina, much superior to the usual greenhouse grown plants. Our stock is maintained in good condition in the field throughout the year, the cuttings of which therefore are of the best available.

With us the troublesome midge is unknown. A soft sickly looking cutting is slow to start and seldom makes a strong plant, but the sunshine hardened cutting, well-rooted and disease free, is filled with potential energy that will make a healthy and profitable planting.

Our prices are all quoted net at destination, on mum cuttings only, the buyer to pay the express and deduct from bill. Packing free. The safe arrival of shipments is assured by daily ice-cooled refrigerator express service. There is no chance for the cuttings to wilt or to heat en route. We assure you good delivery to your plant, and guarantee our stock to be true to name, not to exceed the purchase price.

It takes a lot of planning and work to produce new varieties of chrysanthemums and really good ones do not come often, yet we believe that our new introductions for this year are really outstanding and of exceptional merit, fully equal in quality to our previous well known introductions. We have been very careful in selecting for flower quality, beauty, poise and vegetative habits, and you may be sure that these new varieties will be winners.

OUR PACIFIC COAST VARIETIES OF 1939

CALIFORNIA PEACH

CALIFORNIA GOLD

SAN CARLOS

SAN ANTONIO

CALIFORNIA PEACH—Really this is a peach of a pompon and one that has been proved to be what people want. It is a large substantial single flower of delicate pink when mature, but when opening the upper side of the petals is darker and tinged with crimson. It is truly a distinctive coloring and worthy of its place of distinction. Blooming dates are from October 25th.

CALIFORNIA GOLD—A single yellow of good deep color and good substance. Flower petals are borne regularly as if placed around a golden center. Nice heads with strong stems are characteristic. Blooms from November 15th.

SAN CARLOS—There is a large place on the markets for flowers such as this one. It has the familiar Japanese sturdiness and productivity which are so much an asset to any commercial pompon. The flower is about 3 inches in diameter with neat regular petalage and comparatively large clear yellow cushion. The color is a clear bronzy red shading to deep bronze. It blooms somewhat later than our Japanese Red of last year. November 15th.

SAN ANTONIO—One of the finest disbudded pompons is this large double pink. Stems are strong and straight and easily disbudded. Foliage is good well up to the flower. It is good as a pompon, too, producing good balanced flower heads. November 15th.

Prices for rooted cuttings of the above varieties are at \$15.00 per hundred, \$125.00 per thousand, delivered to you.

NEW JAPANESE NOVELTIES

PRIDE OF SUNNYSLOPE

ALICE TASHIMA

MAMORU TASHIMA

SOUVENIER

Of all the varied types of Chrysanthemums, perhaps the most spectacular and emphatically different are the beautiful and graceful Japanese forms. For hundreds of years the Chrysanthemum has been the object of special attention among plant breeders in Japan, from whom such very lovely and graceful forms as we are offering this year have resulted. You will find the varieties that we are listing are good keepers when cut, which is of especial significance to the commercial flower grower who has long sought for such characteristics. Because of the scarcity of these items we are offering them from 2-inch pots only.

PRIDE OF SUNNYSLOPE—A more attractive form of any Mum is hard to find. Tall and stately it stands out well amid the usual profusion of show flowers. Single plants from 2-inch pots are \$1.00 each, per 10 plants, \$7.50.

ALICE TASHIMA—This is a pure white flower of long pendulant tubular petals which, when extended, measure from 12 to 14 inches across the flower. It is very delicate appearing, yet it is of good substance and a reliable grower. These have kept in perfect condition for more than two weeks after cutting. The variety is early, maturing October 1st. Single plants 50 cents, per 10 \$4.00, per 100 \$35.00.

MAMORU TASHIMA—Few other Mums can compare in color intensity of this rich golden yellow flower. It is not the size of the flower which makes it so very appealing, for it measures only 10 to 12 inches in diameter, but it is the very composition and color that renders it so completely beautiful. Not least among its admirable characteristics is its exceptional keeping quality. October 30th. Single plants 50 cents, per 10 \$4.00, per 100 \$35.00.

SOUVENIER—This tubular petaled form is much like the well known and beautiful Gena Harwood, but it is much larger and stronger. The tips of the long narrow petals are of salmon pink and are nicely curved. The flower is at its best about October 25th. Single plants 50 cents, per 10 \$4.00, per 100 \$35.00.

CASCADE VARIETIES

JANE HARTE (YELLOW)

Selected Mid-Season Varieties

Aggappina. Light bronze Anemone, 2 inches.

Anna Harte. Vigorous single white, 2 inches.

Jane Harte. Vigorous single yellow, 2 inches.

Koyen. Yellow Anemone, 1-1½ inches.

Mikasa. Single white tubular petals, flaring at the tips, 1-1½ inches.

Senorita. Pink single, 1-1½ inches.

Suroku. White Anemone with yellow center, 1-1½ inches.

Prices of the above are \$1.00 per dozen, \$7.50 per hundred.

Rooted cuttings.

This class of Chrysanthemum has been selected for its drooping habit which is essential to Cascade Mums. Cascading is an easy process but requires some special attention. To obtain large specimens the plant should be re-potted frequently to avoid their becoming pot bound; watered and fertilized carefully. Usually three leaders are selected, the outer two being cut back at the fourth joint, the branches of which are repeatedly pinched at each second or third joint. When about a foot long the leaders should be progressively bound to heavy wires which are bent out from the pot to an angle of about 45 degrees. All laterals are pinched back at each second or third joint until about September for these mid-season varieties to insure a compact and uniform body. As it is desirable that all the flowers of the plant come to bloom at approximately the same time for showing, one should be careful in the last stages of pinching. About five days after the last general pinching, the basal third of the entire plant should receive its last pinching, the middle portion about five days later, and the tip section yet five days later. For the small amount of care given, you will be rewarded with a large well shaped plant in which all flowers bloom simultaneously. From the time of the last general disbudding which is usually about September 1st, the supporting wires should be gradually bent down from time to time to the desired position.

OTHER OUTSTANDING INTRODUCTIONS

ARCADIA—(DePetris) The creamy white flowers 2 to 2½ inches in diameter are fully double pompons, well shaped and nicely borne on strong stems. The vigor of the variety is remarkable, which characteristic has aided greatly in its recent popularity. Blooms October 25th.

CAPTAIN BLOOD—(Greco) The name signifies the deep blood red color of this pompon. The reverse side of the petals are tinged with gold which in contrast with the reflexed petals adds to the beauty as the flower matures. It is easily recognized in the field by its strong, straight, sturdy stems with dark green luxuriant foliage. Disbudding is easily accomplished, yielding fine flowers 3 to 4 inches in diameter. Blooming dates are from November 25th on to late December.

JOE BEUERLEIN—(Bristol Nurseries) Single medium sized flower of crimson red. Very good grower. December 5th.

LORIS—(Pierson) Extremely late flowers of yellowish bronze 3 inches in diameter. Good stems. Blooms from December 10th, but may be held until after Christmas.

LONG ISLAND BEAUTY—(Timm) Grown as a disbudded Mum, this grand pink Anemone produces flowers 4 to 5 inches in width with five to six stems per plant. The broad ray petals are white with the large waxy center of yellow, the entire composition of which is that of grandeur and stateliness. Those who have had the chance to grow this new Mum have been not only pleased but well paid. It blooms for Thanksgiving.

YOLANDA—(Greco) This is not just another Anemone. Outstanding in color and vegetative habits, it surpasses all in its class at the Thanksgiving time. The color of both the outer petals and the center is a bronzy apricot of a most pleasing shade. Flowers when disbudded reach from 3 to 4 inches, and is at its best when grown as a disbudded Mum.

Cuttings of the above varieties are at \$7.00 per hundred,
\$65.00 per thousand.

PACIFIC COAST WINNERS OF 1938

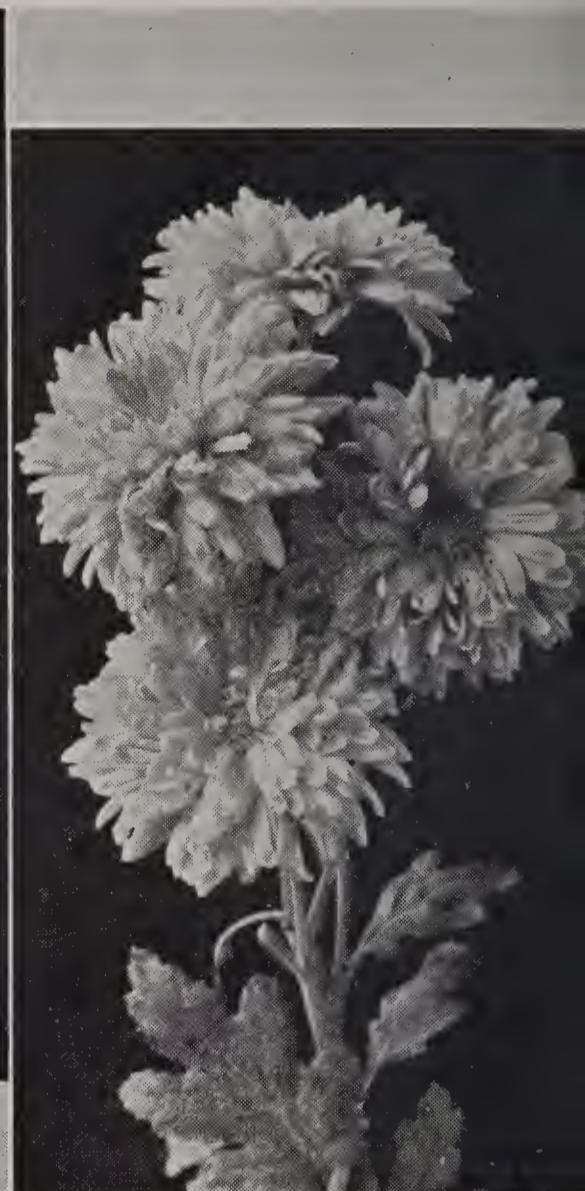

This set of mums all have the same vigorous growing habits as our previous introductions but mature earlier.

MRS. A. KRAMER

KRAMER'S BUFF-ORANGE

HASEGAWA ORANGE

PASADENA

LOS ANGELES

JAPANESE RED

“ Daily refrigerator service brings our cuttings to you in perfect condition. »

PACIFIC COAST WINNERS

MRS. A. KRAMER—This flower is of a clear solid pink with nice long wiry stems and good foliage. It is especially good for disbudding. There was a small amount of this variety available on the Los Angeles markets this year for which there was keen demand. Wholesalers were eager to buy it at any price. Plants are available for the first time this season. We consider this equally as good if not superior to Hasegawa Pink. Blooms November 5th.

KRAMER'S BUFF ORANGE—Without a question this mum is a boon to commercial growers. It is outstanding in color and form, graceful yet substantial and an easy grower with attractive foliage well up to the flowers. The waxy cast to the light bronzy orange flowers truly indicate that they last long and are not easily rumpled. They are more attractive bunched and on display under artificial light than they are in the field with natural setting. Everyone who has seen this mum has liked it and we are pleased to have a limited supply of cuttings to offer this season. November 10th.

HASEGAWA ORANGE—This medium sized pompon is of a delightfully beautiful deep buff with a light orange cast. Flowers are well placed on long stems making flower combinations easy and graceful. It is a good semi-double with petals partially covering the bronzy center. You will find this a good seller irrespective of competition. You will begin cutting this one about November 10th.

PASADENA—This mum is just what the trade is demanding, a vivid bronzy orange, large flowering pompon with broad ray flowers which completely cover the center. It is really an achievement in its color class. November 1st.

LOS ANGELES—A good semi-double clear scarlet flower $2\frac{1}{2}$ inches in diameter and larger. The silvery crimson of the under side of the petals shines as if to set off as a gem the partially showing bronze center. It is a good keeper, too. November 15th.

JAPANESE RED—Nature has been good to this new pompon in putting together so many pleasing characteristics. The long petals of venetian red on the upper side are slightly curved to show the shadings of pansy yellow to light bronze on the under side. With the gold of the center it is an alluring combination. The plant is strong, upright, and well balanced. November 1st.

Rooted cuttings of the above selections are at \$7.00 per hundred,
\$65.00 per thousand, delivered to you.

“ Our prices on mums are f. o. b. your establishment. ”

ROBERT BACON

ROBERT BACON (Bacon)—Of all our plantings Robert Bacon was the most sensational. It was picked as a winner by many visiting commercial florists as well as by the retail trade. The petals are of bronzy gold tipped with red which with the red of the under side subtly showing at the tips makes the flowers most pleasing and cheerful. They make up nicely and are easily arranged to advantage too. Plants are especially vigorous and bear flowers freely. Cutting may begin before thanksgiving and continue until late December.

HASEGAWA PINK—Another treasure picked from the many tried Hasegawa seedlings is this fine pink. Flowers of clear pink with golden centers are borne well on rigid stems. We believe there is no better mid-season pink pompom than Hasegawa Pink. Nov. 15 to 25.

HASEGAWA MINORU—An outstanding variety in Pacific Coast markets. The large sized flowers of rusty bronze color are produced in profusion on sturdy stems. They flower well and are especially good keepers which make them a prize on any market. You will find this variety to sell freely in the face of keen competition. It is a leader in the Los Angeles market and is in demand for shipping. Dec. 15-Jan. 1.

Rooted cuttings of this group are at \$4.00 per hundred, \$35.00 per thousand delivered to you.

« Our cuttings produce vigorous plants. »

LIGHTHOUSE

LIGHTHOUSE (Zamia)—This single pompom is so striking it is one of the first to be recognized in the field. Flowers of bright bronze shading to water-melon red make a pleasing and graceful effect. Nov. 1 to 15.

Cuttings of this variety are at \$4.00 per hundred, \$35.00 per thousand.

TRIED AND PROVED INTRODUCTIONS OF 1937

DAWN

HASEGAWA JOSEPHINE

DAWN (Hasegawa)—This new selection has all the qualities that make a good pompom. It is a tall growing late flowering chrysanthemum of lively chestnut bronze flowers two and one-half inches in diameter. The sprays are wiry, well formed, and graceful. Dec. 10 to 25.

HASEGAWA JOSEPHINE—In habit this resembles very much the Hasegawa Minoru being tall growing, vigorous, and prolific. The individual flowers are somewhat lighter in color and are enhanced by their conspicuous bronzy cushion. Dec. 5 to 20.

HASEGAWA PINK

HASEGAWA MINORU

“Buy healthy outside grown cuttings.”
\$4.00 per hundred, \$35.00 per thousand.

GOOD STANDARD VARIETIES OF POMPONS

\$3.00 per hundred, \$27.50 per thousand.

St. Bridgid	25.00	20.00	10.00

To Our Patrons:

We wish to take this opportunity to thank the thousands of our customers for their past patronage. We have done our utmost to serve you efficiently, and we again would like the privilege of serving you. At our nursery we have a good quantity of stock plants and have the capacity for rooting several million cuttings.

It is now an established fact that outside grown cuttings are stronger, healthier, and produce more vigorous growth than those grown entirely in greenhouses. In our district the troublesome midge is unknown because our dry sunny weather soon destroys it. All of our cuttings are grown and rooted in the open air. You may be sure that you will benefit from the good start that this type of cutting can give you. May we give you a figure on your complete requirements?

Visitors cordially invited to visit our establishment.

Yours very truly,
KRAMER BROTHERS.
